

K-Love and Air 1 serves my family and I as residents of our local community by providing us with critically needed positive and non-offensive lyrics in the music they play, the announcers don't promote a sinful lifestyle like most others do. Educational Media Foundation is the only broadcasting organization that truly helps my children have a better chance at avoiding a devastating lifestyle. The effect on the local community could definately be very negative if K-Love and Air 1 were to be displaced. I personally know of hundreds of children and adults that fully rely on these sources for inspiration. A LPFM broadcaster providing other programming would truly be damaging. I believe that the service provided by K-Love and Air 1 is in the public interest because the airwaves are already completely dominated by very negative influences. It would take away a very important part of our limited daily resources and eventually lead to a much more dangerous atmosphere in our neighborhoods.
